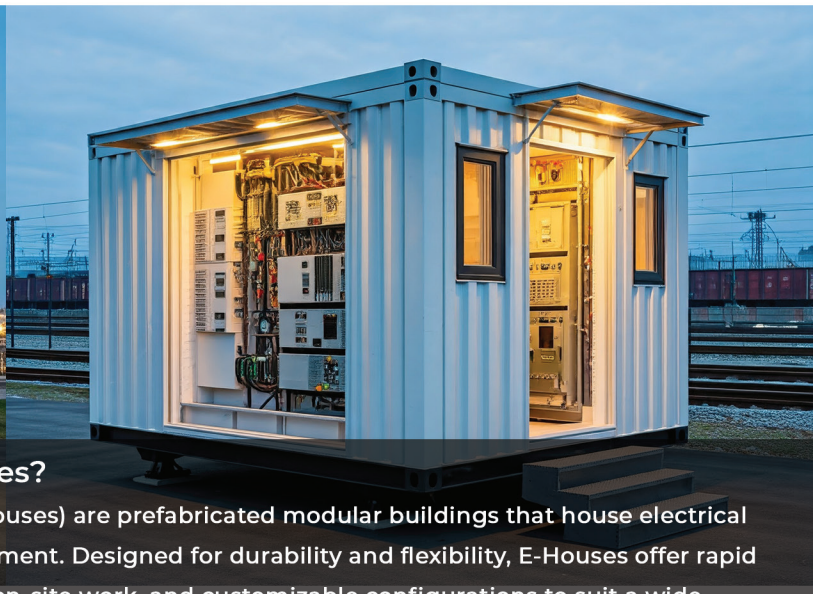
E-Houses



What are E-Houses?

E-Houses (Electrical Houses) are prefabricated modular buildings that house electrical and automation equipment. Designed for durability and flexibility, E-Houses offer rapid deployment, reduced on-site work, and customizable configurations to suit a wide range of applications.

Why Choose Comco Controls for Your E-House Needs?

1. Comprehensize Capabilities

- **Custom Design & Engineering:** Tailored to your project specifications
- **Turnkey Solutions:** From concept to commissioning, we handle it all.
- **Wide Range of Applications:** Suitable for indutries such as Oil & Gas, Mining, Power Generation, and Manufacturing.

2. High Quality Construction

- Built to withstand harsh enviroments and extreme conditions.
- Compliant with CSA, ANSI, IEC, and other industry standards.

3. Expert Integration

- Seamless integration of electrical and automation equipment,including:
  - Switchgear & Motor Control Centers
  - Transformers & UPS Systems
  - PLC & SCADA Systems

4. Rapid Deployment

- Prefabricated off-site for faster delivery and reduced on-site labor.

COST SAVINGS: reduced labor & project timelines

MOBILITY: relocatable units for evolving project needs

CUSTOMIZABLE: built to match your specifac requirements

SAFETY: designed with operator safety in mind

About Comco Controls

With over 35 years of experience, Comco Controls is a leader in providing innovative electrical and automation solutions across Canada and the USA. Our E-Houses are designed with precision and built with quality, ensuring your operations run smoothly and efficiently.
