control software

Helm
Automation Suite

- Receiving
- Batching
- Pelleting
- Grinding
- Load Out
- Other Applications

Helm is Comco's signature facility automation and control software package. This state of the art software platform was developed in house by Comco and allows users and operators to control the operation in your facility either manually or automatically.

control freaks ...and proud of it

- Advanced automated process control
- Inventory and lot tracking surpassing FDA and CFIA requirements
- Comprehensive searchable audits - know every operator action

- Extensive reporting capabilities
- Flexible import/export system
- Custom graphics
- Customer Support

Industries

Helm is easily adaptable and can be used in a wide variety of industries including:

- Feed Production
- Cement
- Asphalt
- Milling
- Pet Food
- Fertilizer
- Seed Processing

Remote Monitoring

Know what happens in your facility even when you're not on site. Helm offers state-of-the-art monitoring from remote locations, giving you control and peace of mind.

Support

Comco offers 24/7/365 North American based telephone support for users included in the first year after purchase.

After the first year, we offer support contracts that are flexible and affordable.
