Certified Electrical and Control Panels

Comco has been manufacturing high quality electrical panels for over 35 years. We have a 6,000sqft panel shop with a dedicated and experienced manufacturing team to support all our customers' needs.

The Comco Difference

- Optimized layout design makes efficient use of space and allows for easy field installation
- Vendor independence allows for cost-effective and fit-for-purpose solutions
- Comprehensive testing ensures highest quality and performance
- Large stock of components ensures meeting client's delivery requirements

Typical Panels and Equipment

- PLC and DCS Panels
- Operator Control Panels
- Motor Control Centers (MCCs)
- Motor Starter Panels
- Soft Start Enclosures
- Variable Frequency Drive (VFD) Enclosures
- Central Distribution Panels (CDPs)
- Network and Communication Racks/Panels
- Power Factor Correction (PFC) Autobanks

Standalone Panels

We work with our customers to provide custom control panels that are fit for purpose. All design drawings are approved by the client prior to manufacturing and all panels are CSA certified for installation in Canada and the US.

Turnkey Solutions

We can also provide turnkey solutions, including consultation in the areas of control systems, power distribution, instrumentation and communications.
